nCoded Solutions Launces **nCoded Licence Manager**

nCoded Solutions have launched the **nCoded Licence Manager**, a smart way for controlling the deployment of our software. Our licencing portal enables us to have visibility of all our installed software systems across our client base. We now have a platform that provides a seamless and an effortless structure whenever we need to install, update and troubleshoot.

Our clients are going to benefit from our Licence Manager because it is now going to be unnecessary for our clients to be at the client's site whenever we are required for licence supporting. Licence Support services will be carried out remotely and free of charge. This also means that our consultants and developers' times will as a result spent on product development, enhancements and upgrades.

Whenever any of our systems are installed, a web-based setup wizard guides the user through the process of setting up the system. Once any of our systems are installed, license updates will be continuously checked from the license manager. In the event that the server hardware is changed, it would require the license to be updated and will allow the client 7 days to rectify the issue. This is to prevent invalid installations of the server components.

Licenses are stored on our cloud server and on the client's server, if they host their own server. However, the information is only received by the client server from the licensing manager's server and updates are not accepted from the client. This prevents users from manipulating our licensing information in order to bypass trial periods or extend their licenses

The screenshot displays the 'Licensing Portal' interface. On the left is a navigation menu with options: Home Page, Systems, Clients, Licenses, Updates, Logs, and Administration. The main content area is titled 'Home Page - Quick Overview of all Systems and Services' and contains three panels:

- Systems Overview:** A table listing installed systems.

System Name	Current Version	Last Update	Updated By
Licensing Portal	1.0.0	16 Sep 2016 09:43	Hannes Becker
nCoded Tracking	1.0.0	13 Apr 2017 11:11	Hannes Becker
KPI Dashboard	2.3.1	09 Dec 2016 13:12	Hannes Becker
Dynamic Dashboard	4.0.0	12 Feb 2017 06:52	Hannes Becker
- Expiring Licenses:** A table listing licenses that are about to expire.

Company Name	System Name	Users	Expiring On
Dummy Company 1	nCoded Tracking	2	01 Jul 2017 12:00
Dummy Company 1	Dynamic Dashboard	1	01 Jul 2017 12:00
Dummy Company 2	nCoded Tracking	85	31 Jul 2017 12:00
Dummy Company 2	KPI Dashboard	5	31 Jul 2017 12:00
Dummy Company 3	nCoded Tracking	20	15 Jul Aug 12:00
Dummy Company 4	Dynamic Dashboard	3	01 Dec 2016 12:00
Dummy Company 5	Dynamic Dashboard	12	31 Dec 2018 12:00
- Outdated Clients:** A section indicating 'No outdated clients.'

Client Name	System Name	Users	Installed On	Expiring On
No outdated clients.				
- Trial Users:** A table listing trial users.

Company Name	System Name	Users	Installed On	Expiring On
Dummy Company 6	KPI Dashboard	1	03 May 2017 12:00	03 Jun 2017 12:00
Dummy Company 7	nCoded Tracking	5	03 May 2017 12:00	01 Jan 2018 12:00
